You see another column of smoke rise from beyond the burning farmhouse, and you grit your teeth in frustration, wondering why your men are wasting the time to properly cremate the bodies of possible enemies. A few minutes later, your men return, Sergeant Fenton with them.

"Right sir, the bodies are dealt with, what do we do with this lot?"

Your orders were to bring these men back in chains, but the orders you were given this morning have little bearing on the situation as it stands.

There is, of course the fact that, loyal King's men or not, these men have obviously committed murder. As set down by the Articles of War, these men deserve death.

On the other hand, if these men did indeed execute a bunch of vile partisans, then they were dispensing of the King's justice. They deserve reprimand, but certainly not the indignity of being escorted back in chains. Besides, Captain Lefebvre might look upon you favourably if you were to treat his pet attack dogs well.

<input checked="" type="radio"/> Drag them back in chains.
<input type="radio"/> Escort them back as guests.
<input type="radio"/> Have them shot for murder.

Nothing special so I can't really recommend it. Basic action game with lots of traps.... This is a wonderfully heartrending game. The story pulls you right in. You want to help the boy "save" his sister right from the start. I loved the graphics. I'm very familiar with Artifex Mundi games, so it only took me a short while to figure out the game mechanics. I would highly recommend this game to those who enjoy hidden item puzzle games. The one drawback is the price. I took my time and completed this game, in a few hours, in one sitting. I find it hard to reconcile the cost of fifteen dollars for a few hours of gameplay. I recently completed another hidden item puzzle game (with 17+ hour average game time), which is being sold for ten dollars. In my opinion, this game is over-priced for the playable hours. I have noticed that this unfortunately seems to be a trend with the newer Artifex Mundi games: short play time with a high price. The overall cost, though, is my only complaint, as the rest of the game is awesome and enjoyable.. Hilarious, and workshop support allows even more compatibility.. A nice arcade style game for casual players or hardcore ones. Basically, the tiny droids revolve around you that attack and protect you from opposing droids. A pretty good game that anyone can play and play against for a couple of bucks!. it's not a good game tbh.. This is a Pac-Man type maze game with randomly generated dungeons. This interesting game has a lot of gamemodes to choose from. the first few gamemodes are not really that great because it doesn't give the player anything to do, Its just run and grab a key to get to the next easy level ... that's it you just keep repeating this over and over again. You would think that as you go further into the game it gets harder as you go, well it's surprisingly easy because most of the time the exit is rendered literally right next to where you spawned with the key right next to it. The game seemed hopeless but there was one saving grace that actually made this game truly enjoyable. The Adventure Mix mode makes you utilize all of its items and gives the player something to do. This mode gives you interesting tasks to do in the dungeon itself. Whether it be killing 5 skeletons or collecting gems through out the dungeon. This mode truly saves the game for being boring and it keeps it fun and refreshing.

If you are interested in this game be sure that the first few gamemodes are pretty crappy but there is one gamemode that makes this game worth the \$2. Best DubStep simulator ever!!! Can't wait for more.. Cute little puzzle game where you have to move blocks to solve puzzles. It reminds me of Goof Troop and other similar games. I hate them. So it's not cute at all. Ok, it IS cute, but it's frustrating at the same time. End of conversation.

[Rating: 65/100]

this is my most favorite strategy game, id say best in the series, it is completely bugless and glitchless and it offers 300+ hours of gameplay (if you dont repeat maps) im currently 77 hours in and i havent even finished the main campaign (campaign is only a small part of what the game offers). Beauty Bounce is the third or maybe second installment in the Dharker Studio's Bounce series. In this one you face your biggest nemesis, nay the enemy of mankind itself; the bank. Somehow your

♥♥♥♥♥♥♥♥♥♥♥♥♥♥♥♥grandmother late loving grandmother that owned a beach resort for 50 years never paid the freaking thing off. Can you sex the auditor into getting better rates? I did and let me tell you, she is a natural blonde. But if you're a man like me and thinks sex outside of marriage is haram then you can always take the next logical route; hosting a ♥♥♥♥♥ing stupid beauty pageant to draw crowds to obviously failing beach resort that the bank is foreclosing on due to incompetence of the new management that inherited the business from his grandmother on her deathbed even though he flunked out of law school why does he have so much backstory of being a failure I'll admit it took me four years to get my two year degree but I didn't flunk out if you can get in you're set this dude is just a screw up.

Anyway they story is mediocre, but has nice art and manages to get someone like me to keep buying their games.

Took me 75 minutes to get all the CG.

No girl really stood out.

Seems a tad rushed at times.

Losing the resort is the best ending.. This movie gives you insight on the origins of video games being transformed to the home consoles and personal computers.

Know your history, because without Atari there's a possibillity you would not be using this platform to read this very review.. I bought this product without so much looking at the reviews. My fault. It is unfinished and lacks everything you'd expect from a game. The only positive about this game is the fans, who programmed the unofficial patches (currently V1.08.1 available on <http://\spacebasehub.net/>).
